

Web appendix 5. Characters 41 to 43

Qiangopatrobis sp.

41 Pronotal basal angle
0 = 110 degrees

43 Pronotal basal foveal
macrosculpture
0 = not wrinkled,
sparsely covered
with small, fine
punctures

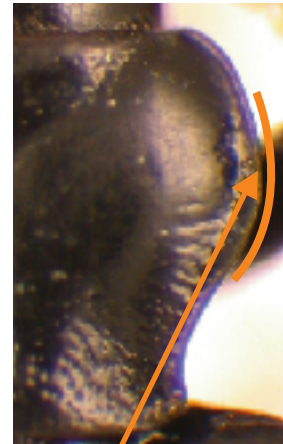

Diplous rugicollis

41 Pronotal basal angle
1 = 115 degrees

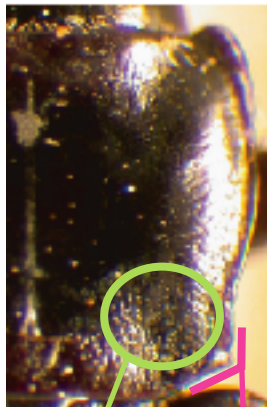

43 Pronotal basal foveal
macrosculpture
1 = not wrinkled,
densely covered with
large punctures

Diplous davidis

42 Pronotal lateral margin
near midlateral seta
0 = rounded

Diplous californicus

41 Pronotal basal angle
3 = 135 degrees

43 Pronotal basal foveal
macrosculpture
3 = wrinkled with
3 or 4 medium punctures
which are usually obliterated
by the wrinkles

Diplous aterrimus

41 Pronotal basal angle
2 = 120 degrees

43 Pronotal basal foveal
macrosculpture
2 = wrinkled and
sparsely covered
with medium wrinkles

42 Pronotal lateral margin
near midlateral seta
1 = flattened curve
